

# TOMBOII

77% Nylon / 23% Spandex

## A. MEASURING THE WAISTBAND - Stand with feet together

### a. If wearing standard-cut pants (not high or low-cut):

- i. Measure where the belt would usually be. If they're already wearing a belt, shimmy it down and measure where it just was. **Do not measure over the belt itself, as you'll get a too-large result.**
- ii. Jot down the measurement and shimmy the pants and belt back up. Make sure the pants are hiked up all the way to the crotch, but that the waistband still sits naturally.

### b. If it's unclear where the waistline is:

- i. Find the top of the hipbone by bending to the side as if doing a side stretch. Place your finger, pointing upward, on the very top of the hipbone.
- ii. **Measure 2" down** from finger to hipbone, using a finger to mark the spot: this is the waistband area.
- iii. Measure the waistband area and use the chart to find the smallest appropriate sizing belt (if available) to try on. Keep the belt on for the next steps.

## B. MEASURING THE HIPS - Stand with feet together

- a. Measure around the hips. They're usually located a couple inches below the waistband, at the widest part of the buttocks area.

## C. MEASURING THE GUSSET - Stand with feet apart, then together

- a. The gusset measurement goes from the waistband at the front of the body, through the legs, and up to the waistband at the back of the body.
- b. **Stand with feet shoulder-width apart. If wearing a skirt or dress, fold and tuck the material so that the crotch is fully covered but the fabric lays flat.**
- c. Start measuring from the front of the body, at the top of the "waistband" area. Next, bring the measuring tape through the legs and up to the back, to the top of the "waistband."
- d. **Stand with feet together** and pull the measuring tape up to the back waistband to get their preferred fit (snug or extra snug). Make sure the tape measure doesn't look like a thong—you don't want it to go through the butt cheeks too tightly!
- e. Using your finger, hold the tape in place at the back while letting go of it in the front. Jot down the measurement where your finger is.

## D. MEASURING THE THIGH - Stand with feet apart, then together

- a. Have the customer **measure 1" down** from the crotch, marking it with their finger.
- b. Have them place the measuring tape at the 1" position, wrapping it around the thigh.

## E. MEASURING THE LEG OPENING - Stand with feet apart, then together

- a. Have the customer **measure 4" down** from the crotch area, marking it with their finger.
- b. Place the **measuring tape at the 4" position**, wrapping it fully around the mid-thigh area.
